Owner/Operator Hacker Chemical and Plastic Corp. Facility Name Hacker Chemical Salisbury Plant

Address Route 6, Goddard Parkway, Box 14 Salisbury, Maryland Zip 21801

Description of Work Activity Manufacture, Print, and Laminate PVC Film

I. Generators

A. Description (10.51.03.01-03)

- 1) Does the Facility generate or has it accumulated those quantities of hazardous waste described in 10.51.02.05 C.? ☒ Yes, ☐ No.
- 2) Has the facility obtained an EPA identification number? ☒ Yes, ☐ No.
- 3) Describe the amount of waste generated. (day, week or month): approx. 1500 gallons / month
- 4) Under which category is the waste(s)?
☒ Ignitable ☐ Reactive ☐ Corrosive
☐ EP Toxic ☒ RCRA Listed FOOS

B. Manifest (10.51.03.04)

- 1) Is Maryland manifest system in operation for off-site shipment? ☒ Yes, ☐ No.
- 2) Is TSD Facility to receive DHS identified by YES Name, YES Address, YES EPA ID Number?
- 3) Is alternate facility identified? ☐ Yes, ☒ No.
- 4) Is generator identified by YES Name, YES Address, YES Telephone Number, YES MD/EPA ID Number?
- 5) Is each transporter identified by YES Name, YES EPA ID Number, YES Maryland Certification Number? Vehicle Cert. No.
- 6) Is waste properly described? ☒ Yes, ☐ No.
- 7) Is shipment date marked? ☒ Yes, ☐ No.
- 8) Is quantity of waste described by Unit of Weight, Volume? described in gallons (CAPACITY)
- 9) Are containers to be loaded identified by YES Type, YES Number?
- 10) Is proper certification noted and signed by generator? ☒ Yes, ☐ No.
- 11) Are adequate copies available for operator, transporter and TSD? ☒ Yes, ☐ No.

C. Pre-Transport Requirements (10.51.03.05)

- 1) Is each container marked with date accumulation began? ☒ Yes, ☐ No. If yes, has any waste been stored over 90 days? ☐ Yes, ☒ No. How much _____
- 2) Are containers in good condition? ☒ Yes, ☐ No. If no, explain _____
- 3) Are containers properly labeled? ☒ Yes, ☐ No.
- 4) Does generator have approved emergency contingency plan? ☒ Yes, ☐ No.

D. Recordkeeping and Reporting (10.51.03.06)

- 1) Does the generator have: copies of all signed manifests from the previous three years? ☒ Yes, ☐ No; copies of each Annual Report and Exception Report? ☐ Yes, ☐ No. N/A
- 2) Does the generator retain, for a period of three years, all wastes analyses? ☒ Yes, ☐ No.
- 3) Has the generator filed Exception Reports as required by 10.51.03.06 C? ☐ Yes, ☒ No. N/A

II. Treatment, Storage, Disposal (TSD)

A. Site characterization (10.51.05.02)

- 1) Facility Type
☐ Thermal Treatment ☐ Biological Treatment
☐ Recycling/Recovery ☐ Land Treatment
☐ Waste Oil ☐ Incineration
☐ Chemical Treatment ☐ Landfill Operation
☐ Physical Treatment ☐ Below Ground Tanks
☐ Open Pile ☐ Other _____
☐ Surface Impoundment
☐ Drums
☐ Above Ground Tank(s)

- 2) Does facility generate DHS? ☐ Yes, ☐ No.
- 3) Does facility have waste analysis plan? ☐ Yes, ☐ No. If yes, are the procedures of that plan being followed? ☐ Yes, ☐ No.
- 4) Can facility personnel identify DHS being handled? ☐ Yes, ☐ No.
- 5) Can facility personnel confirm that DHS received equal those on manifest form? ☐ Yes, ☐ No.
- 6) Is there a 24-Hour surveillance system to monitor active portion of facility? ☐ Yes, ☐ No. If No, is there an artificial or natural boundary? ☐ Yes, ☐ No. Is there a means to control entry? ☐ Yes, ☐ No. Is there a restricted access sign posted? ☐ Yes, ☐ No.
- 7) Does facility have: ☐ emergency equipment inspection log, ☐ written schedule for inspections, ☐ security devices, operating & structural prevention equipment?
- 8) Have facility personnel completed classroom/on-site training? ☐ Yes, ☐ No. Are records maintained of: ☐ Job titles/names of employees ☐ job descriptions, ☐ Type/amount of continuing training?
- 9) Are general requirements for Ignitable, Reactive or Incompatible Wastes as required in 10.51.05.02 H addressed? ☐ Yes, ☐ No.

B. Preparedness and Prevention (10.51.05.03)

- 1) Facility has the following equipment? ☐ Internal communication/alarm system for on-site personnel. ☐ device for summoning emergency assistance. ☐ adequate fire control equipment, water, & suppression chemicals, ☐ list of aforementioned equipment.
- 2) Does facility have adequate area for emergency movement? ☐ Yes, ☐ No.

C. Contingency Plan and Emergency Procedures (10.51.05.04)

- 1) Does facility have an approved contingency plan for: ☐ Personnel to implement emergency procedures to fire, explosions, and unplanned releases to air, soil and water? ☐ Responding emergency units to provide assistance during emergency situations? ☐ A list of emergency equipment needed to cope with situation?
- 2) Are emergency response coordinators listed by name, address, & phone number? ☐ Yes, ☐ No.
- 3) Is there an evacuation plan if recommended? ☐ Yes, ☐ No.
- 4) Are emergency coordinators available on twenty-four hour basis? ☐ Yes, ☐ No.

D. Manifest System, Recordkeeping, and Reporting (10.51.05.05)

- Facility has a written operating record which contains the following information:
- 1) ☐ description & quantity of DHS received.
 - 2) ☐ method & date of DHS treatment, storage, or disposal.
 - 3) ☐ location & quantity at each DHS location in facility.
 - 4) ☐ detailed records & results of waste analysis & treatability tests performed.
 - 5) ☐ detailed operating summary reports.
 - 6) ☐ description of emergency incidents that required implementation of contingency plan.
 - 7) ☐ records & results of inspections of emergency equipment, TSD systems & hazardous waste areas.
 - 8) Has facility retained, for at least 3 years, copies of all manifests? ☐ Yes, ☐ No.

- 5) Are the following items maintained in the operating record: _____ on a map, the exact location and dimensions, including depth, of each cell with respect to permanently surveyed benchmarks? _____ contents of each cell and approximate location of each hazardous waste type within the cell?
- 6) Are bulk, non-containerized or waste containing free liquids placed in the landfill? _____ Yes, _____ No. If yes: _____ is a leachate collection system available to remove leachate?, and _____ is the liquid stabilized or treated physically or chemically prior to disposal?
- 7) Are empty containers crushed flat or shredded before burial in the landfill? _____ Yes, _____ No.
- 8) Are containers holding liquid wastes (or waste containing free liquids placed in the landfill? _____ Yes, _____ No. If yes, describe containers on comments below.
- 9) Are ignitable or reactive wastes placed in a landfill? _____ Yes, _____ No. If yes: _____ is the waste treated, rendered, or mixed before or immediately after placement in the landfill so that the resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive waste? _____ Are incompatible wastes segregated in different landfill cells?

M. Incinerator/Thermal Treatment (10.51.05.15 & .16)

- 1) Prior to burning waste not previously incinerated or thermally processed; does the operator conduct waste analysis for the following:
 _____ heating value of the waste;
 _____ halogen content and sulfur in the waste;
 _____ concentrations of lead and mercury unless documented data is available which show these elements not to be present?
- 2) Are instruments related to combustion and emission control monitored at least every 15 minutes? _____ Yes, _____ No.
- 3) Is the stack plume observed visually at least hourly for color and opacity? _____ Yes, _____ No, _____ N/A.
- 4) Is the incinerator or thermal process and associated equipment inspected daily for leaks, spills and fugitive emissions? _____ Yes, _____ No.
- 5) Is all of the above information documented in the facility's operating record? _____ Yes, _____ No.

N. Chemical, Physical and Biological Treatment (10.51.05.17)

- 1) Are all treatment processes or equipment in good condition, i.e., no signs of leakage, corrosion or any other deterioration? _____ Yes, _____ No.
- 2) Are treatment processes or equipment with continuous inflow of hazardous waste equipped with a means to stop the inflow? (e.g., waste feed cutoff system or bypass system to a standby containment device) _____ Yes, _____ No.

- 3) Are waste analyses performed or written documentation obtained before placing a substantially different hazardous waste into treatment processes or equipment? _____ Yes, _____ No.
- 4) Is this information recorded in the facility's operating record? _____ Yes, _____ No.
- 5) Are daily inspections conducted for discharge control equipment (e.g., bypass systems, waste feed cutoff systems, drainage systems and pressure relief systems)? _____ Yes, _____ No.
- 6) Is data gathered from monitoring equipment (e.g., pressure and temperature gauges) daily? _____ Yes, _____ No.
- 7) Are construction materials of the treatment process or equipment and the immediate surrounding area inspected weekly for signs of leakage, corrosion or any other deterioration? _____ Yes, _____ No.
- 8) Are the results of these inspections recorded in an inspection log or summary? _____ Yes, _____ No.
- 9) Are ignitable or reactive wastes placed in a treatment process? _____ Yes, _____ No. If yes: _____ Are wastes treated, rendered, or mixed before or immediately after placement in the treatment process or equipment so that the resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive wastes under Section 261.21 or 261.23 of the RCRA Regulations? _____ Are wastes treated in such a way that they are protected from any material or conditions which may cause the waste to ignite or react?
- 10) Are incompatible wastes kept from being placed in the same treatment process or equipment? _____ Yes, _____ No.

O. Permit Requirements (10.51.07)

- 1) Does the facility have a DHS permit for its activity? _____ Yes, _____ No.
 If no, has the facility submitted an application for a DHS permit? _____ Yes, _____ No.
- 2) List any special Permit requirements that are not in full compliance.

Comments: The above facility closed down the calender operation in January 1992. Therefore, the calender unit, the electrostatic precipitator, and the cooling tower are not in operation. Just the printing plant portion is operating. Waste Solvent Storage Area: 21 drums of waste solvent were present, all up on pallets, no leakage observed, containers in good condition, however, one drum did not exhibit a hazardous waste label. This facility shall place the proper hazardous waste label on this drum immediately. The earliest starting accumulation date observed was 01/25/92. Inspection of the Manifests of the most recent off-site shipment (Notes): 1/25/92 - Waste Solvent, Non-Flammable, methyl ethyl ketone liquid, EPC5, 2750 gal, 55 DR, Harker-Mercel, Inc. Facility - Mercer, Ia. 3/25/92 - Waste Solvent, Non-Flammable, methyl ethyl ketone liquid, EPC5, 90 DR, EPC5, 90 DR, Harker-Mercel, Inc. Facility - Mercer, Ia.

Inspector's Name: W. Fortune

Title: Waste Management Administrator - Inspector

Facility Location: HACKER CHEMICAL Solubility Plant

Central Printing Solubility, MO

Facility Present during inspection: Benny Goldenside

Title: Plant Engineer

Address Box 14, Goddard Parkway, Rt 6 Salisbury, Maryland Zip 21801

Description of Work Activity Manufacture, Print, and Laminate PVC Film

I. Generators

A. Description (10.51.03.01-03)

- Does the Facility generate or has it accumulated those quantities of hazardous waste described in 10.51.02.05 C?
☒ Yes, ☐ No.
- Has the facility obtained an EPA identification number?
☒ Yes, ☐ No.
- Describe the amount of waste generated. (day, week or month)
approx 975 gallons/month
- Under which category is the waste(s)?
☒ Ignitable ☐ Reactive ☐ Corrosive
☐ EP Toxic ☒ RCRA Listed FO05

B. Manifest (10.51.03.04)

- Is Maryland manifest system in operation for off-site shipment?
☒ Yes, ☐ No.
- Is TSD Facility to receive DHS identified by YES Name, YES Address, YES EPA ID Number?
- Is alternate facility identified? ☐ Yes, ☒ No.
- Is generator identified by YES Name, YES Address, YES Telephone Number, YES MD/EPA ID Number?
- Is each transporter identified by YES Name, YES EPA ID Number, YES Maryland Certification Number? Vehicle Cert. No.
- Is waste properly described? ☒ Yes, ☐ No.
- Is shipment date marked? ☒ Yes, ☐ No.
- Is quantity of waste described by ☐ Unit of Weight, ☐ Volume? described in gallons (CAPACITY)
- Are containers to be loaded identified by ☒ Type, ☐ Number?
- Is proper certification noted and signed by generator?
☒ Yes, ☐ No.
- Are adequate copies available for operator, transporter and TSD? ☒ Yes, ☐ No.

C. Pre-Transport Requirements (10.51.03.05)

- Is each container marked with date accumulation began?
☒ Yes, ☐ No. If yes, has any waste been stored over 90 days? ☒ Yes, ☐ No. How much thrice
55-gallon drums
- Are containers in good condition? ☒ Yes, ☐ No. If no, explain _____
- Are containers properly labeled? ☒ Yes, ☐ No.
- Does generator have approved emergency contingency plan? ☒ Yes, ☐ No.

D. Recordkeeping and Reporting (10.51.03.06)

- Does the generator have: copies of all signed manifests from the previous three years? ☒ Yes, ☐ No; copies of each Annual Report and Exception Report?
☐ Yes, ☐ No. N/A
- Does the generator retain, for a period of three years, all wastes analyses? ☐ Yes, ☐ No. Waste is listed
- Has the generator filed Exception Reports as required by 10.51.03.06 C? ☐ Yes, ☐ No. N/A

II. Treatment, Storage, Disposal (TSD)

A. Site characterization (10.51.05.02)

- Facility Type
☐ Thermal Treatment ☐ Biological Treatment
☐ Recycling/Recovery ☐ Land Treatment
☐ Waste Oil ☐ Incineration
☐ Chemical Treatment ☐ Landfill Operation
☐ Physical Treatment ☐ Below Ground Tanks
☐ Open Pile ☐ Other
☐ Surface Impoundment ☐ Drums

- Does facility generate DHS? ☐ Yes, ☐ No.
- Does facility have waste analysis plan? ☐ Yes, ☐ No. If yes, are the procedures of that plan being followed?
☐ Yes, ☐ No.
- Can facility personnel identify DHS being handled?
☐ Yes, ☐ No.
- Can facility personnel confirm that DHS received equal those on manifest form? ☐ Yes, ☐ No.
- Is there a 24-Hour surveillance system to monitor active portion of facility? ☐ Yes, ☐ No. If No, is there an artificial or natural boundary? ☐ Yes, ☐ No. Is there a means to control entry? ☐ Yes, ☐ No. Is there a restricted access sign posted?
☐ Yes, ☐ No.
- Does facility have: ☐ emergency equipment inspection log, ☐ written schedule for inspections, ☐ security devices, operating & structural prevention equipment?
- Have facility personnel completed classroom/on-site training? ☐ Yes, ☐ No. Are records maintained of: ☐ Job titles/names of employees ☐ job descriptions, ☐ Type/amount of continuing training?
- Are general requirements for Ignitable, Reactive or Incompatible Wastes as required in 10.51.05.02 H addressed?
☐ Yes, ☐ No.

B. Preparedness and Prevention (10.51.05.03)

- Facility has the following equipment? ☐ Internal communication/alarm system for on-site personnel, ☐ device for summoning emergency assistance, ☐ adequate fire control equipment, water, & suppression chemicals, ☐ list of aforementioned equipment.
- Does facility have adequate area for emergency movement?
☐ Yes, ☐ No.

C. Contingency Plan and Emergency Procedures (10.51.05.04)

- Does facility have an approved contingency plan for:
☐ Personnel to implement emergency procedures to fire, explosions, and unplanned releases to air, soil and water?
☐ Responding emergency units to provide assistance during emergency situations?
☐ A list of emergency equipment needed to cope with situation?
- Are emergency response coordinators listed by name, address, & phone number? ☐ Yes, ☐ No.
- Is there an evacuation plan if recommended? ☐ Yes, ☐ No.
- Are emergency coordinators available on twenty-four hour basis? ☐ Yes, ☐ No.

D. Manifest System, Recordkeeping, and Reporting (10.51.05.05)

- Facility has a written operating record which contains the following information:
- ☐ description & quantity of DHS received.
 - ☐ method & date of DHS treatment, storage, or disposal.
 - ☐ location & quantity at each DHS location in facility.
 - ☐ detailed records & results of waste analysis & treatability tests performed.
 - ☐ detailed operating summary reports.
 - ☐ description of emergency incidents that required implementation of contingency plan.
 - ☐ records & results of inspections of emergency equipment, TSD systems & hazardous waste areas.
 - Has facility retained, for at least 3 years, copies of all mani-

This facility is a GENERATOR ∴ Page not applicable.

E. Groundwater Monitoring (10.51.05.06)

- 1) Has facility implemented a groundwater monitoring program? ☐ Yes, ☐ No, ☐ N/A.
- 2) Are samples from the groundwater monitoring system being analyzed according to the groundwater sampling and analyses plan? ☐ Yes, ☐ No.
- 3) Is this plan set up in accordance with 10.51.05.06 C? ☐ Yes, ☐ No.
- 4) Has groundwater quality assessment program been prepared? ☐ Yes, ☐ No.
- 5) Are proper groundwater sampling and analyses records kept? ☐ Yes, ☐ No.
- 6) Are the necessary reports on groundwater monitoring information being forwarded to the Secretary? ☐ Yes, ☐ No.
- 7) Do the reports match the facility records? ☐ Yes, ☐ No.

F. Closure, Post-closure, and Financial Requirement (10.51.05.07 & .08)

- 1) Does the facility have an approved closure plan that meets the financial requirements? ☐ Yes, ☐ No.
- 2) For surface impoundments, land treatment, and landfills, does the facility have an approved post-closure plan that meets the financial requirements? ☐ Yes, ☐ No.
- 3) Does facility maintain liability insurance? ☐ Yes, ☐ No.

G. Container Management (10.51.05.09)

- 1) Are all containers: (a) ☐ in good condition, i.e., no signs of leakage, corrosion, or any other deterioration/deformation; (b) ☐ lined or made of compatible material such that hazardous wastes placed into them will not result in reaction or corrosion; (c) ☐ sealed during storage.
- 2) Are storage areas for hazardous waste containers inspected by owner/operator at least once a week? ☐ Yes, ☐ No.
- 3) Is an inspection log maintained? ☐ Yes, ☐ No.
- 4) Are containers holding ignitable or reactive waste located at least 50 feet from the facility's property line? ☐ Yes, ☐ No.
- 5) Are incompatible wastes placed in separate containers? ☐ Yes, ☐ No.
- 6) Are storage containers holding hazardous wastes which are incompatible with nearby materials stored in containers, tanks, piles, or surface impoundments separated by dikes, berms, walls, or other devices? ☐ Yes, ☐ No.

H. Tanks (10.51.05.10)

- 1) Are all tanks in good condition, i.e., no signs of leakage, corrosion, or any other deterioration? ☐ Yes, ☐ No.
- 2) Are uncovered tanks operated to ensure a minimum of two feet of freeboard? ☐ Yes, ☐ No.
If not, is tank equipped with a containment structure (e.g., dike or trench), a drainage control system, or a diversion structure (e.g., standby tank) with a capacity that equals or exceeds the volume of top 2 ft. of the tank? ☐ Yes, ☐ No.
- 3) Are tanks with continuous inflow of hazardous waste equipped with a means to stop this inflow (e.g., waste feed cut-off system or by-pass to a standby tank)? ☐ Yes, ☐ No.
- 4) Are waste analyses conducted or written documentation obtained before placing a substantially different hazardous waste into tank used for storage or treatment? ☐ Yes, ☐ No.
- 5) Are daily inspections conducted for discharge control equipment (e.g., by-pass systems, waste feed cut-off systems and drainage systems)? ☐ Yes, ☐ No.
- 6) Is data gathered from monitoring equipment (e.g., pressure and temperature gauges) at least once each operating day? ☐ Yes, ☐ No.
- 7) Is the level of waste in the tank checked at least once each operating day? ☐ Yes, ☐ No.
- 8) Is (are) the tank(s) inspected weekly to detect corrosion or leaking of fixtures or seams? ☐ Yes, ☐ No.
- 9) Are the results of these inspections recorded in an inspection log or summary? ☐ Yes, ☐ No.
- 10) Are ignitable or reactive wastes stored in tanks? ☐ Yes, ☐ No. If yes:
a) Is the waste treated, rendered, or mixed before or immediately after placement in the tank so that the resulting waste, mixture, or dissolution of materials no longer meets the definition of ignitable or reactive wastes under Parts 261.21 or 261.23 of the RCRA Regulations?

- b) Is waste stored or treated in such a way that it is protected from material or conditions which may cause the waste to ignite or react? ☐ Yes, ☐ No.
- c) Is owner/operator of a facility which treats or stores ignitable or reactive wastes in covered tanks in compliance with the National Fire Protection Association's (NFPA's) buffer zone requirements for tanks contained in tables 2-1 through 2-6 of the "Flammable and Combustible Code—1977"? ☐ Yes, ☐ No.

I. Surface Impoundments (10.51.05.11)

- 1) Is two feet of freeboard maintained in the surface impoundment? ☐ Yes, ☐ No.
- 2) Do all earthen dikes have protective covers (e.g., grass, shale or rock) to minimize wind and water erosion and to preserve dike structural integrity? ☐ Yes, ☐ No.
- 3) Are waste analyses conducted or written documentation obtained before placing a substantially different hazardous waste into a surface impoundment used for storage or treatment? ☐ Yes, ☐ No.
- 4) Is the freeboard level inspected daily? ☐ Yes, ☐ No.
- 5) Is the surface impoundment, including dikes and vegetation, inspected weekly to detect leaks, deterioration, or failures in the impoundment? ☐ Yes, ☐ No.
- 6) Are the results of these inspections recorded in an inspection log or summary? ☐ Yes, ☐ No.
- 7) Are ignitable or reactive wastes stored in a surface impoundment? ☐ Yes, ☐ No. If yes:
a) Is the waste treated, rendered, or mixed before or immediately after placement in the impoundment so that the resulting waste, mixture or dissolution of material no longer meets the definition of ignitable or reactive waste under Parts 261.21 or 261.23 of the RCRA Regulations? ☐ Yes, ☐ No.
b) Are incompatible wastes segregated in separate surface impoundments so that spontaneous reactions are avoided? ☐ Yes, ☐ No.

J. Waste Pile (10.51.05.12)

- 1) Is wind dispersal of the pile controlled? ☐ Yes, ☐ No, ☐ Not Needed.
- 2) Are additions to the pile being analyzed prior to adding them to the pile? ☐ Yes, ☐ No.
- 3) Is hazardous waste leachate or runoff collected? ☐ Yes, ☐ No. Is the pile protected from precipitation and runoff? ☐ Yes, ☐ No.
- 4) Are ignitable or reactive wastes protected from materials or conditions that might cause it to ignite or react? ☐ Yes, ☐ No, ☐ N/A.
- 5) Are incompatible wastes hauled in a manner as to assure separation? ☐ Yes, ☐ No, ☐ N/A.

K. Land Treatment (10.51.05.13)

- 1) Will the use of land treatment result in the waste being less hazardous or non-hazardous? ☐ Yes, ☐ No.
- 2) Is run-on diverted away from the active portion of the facility? ☐ Yes, ☐ No. Is run-off from the active portion of the facility collected? ☐ Yes, ☐ No.
- 3) Has the proper waste analyses been performed? ☐ Yes, ☐ No.
- 4) If food chain crops are to be grown on the active portion of the facility has the necessary documentation required been provided? ☐ Yes, ☐ No.
- 5) Has the owner/operator written and implemented an unsaturated zone monitoring plan? ☐ Yes, ☐ No.
- 6) Have the additional requirements for a closure and post-closure plan been addressed? ☐ Yes, ☐ No.
- 7) Are ignitable or reactive wastes immediately incorporated into the soil? ☐ Yes, ☐ No.
- 8) Are incompatible wastes hauled according to 10.51.05.131? ☐ Yes, ☐ No.

L. Landfills (10.51.05.14)

- 1) Is run-on diverted away from the facility's active portions? ☐ Yes, ☐ No.
- 2) Is run-off collected from the landfill's active portions? ☐ Yes, ☐ No.
- 3) Has a hazardous waste determination been made on the run-off? (Identification and Listing of Hazardous Waste) ☐ Yes, ☐ No.
- 4) Is the landfill managed so as to control wind dispersal? ☐ Yes, ☐ No.

- 5) Are the following items maintained in the operating record:
 _____ on a map, the exact location and dimensions, including depth, of each cell with respect to permanently surveyed benchmarks? _____ contents of each cell and approximate location of each hazardous waste type within the cell?
- 6) Are bulk, non-containerized or waste containing free liquids placed in the landfill? _____ Yes, _____ No. If yes: _____ is a leachate collection system available to remove leachate?, and _____ is the liquid stabilized or treated physically or chemically prior to disposal?
- 7) Are empty containers crushed flat or shredded before burial in the landfill? _____ Yes, _____ No.
- 8) Are containers holding liquid wastes (or waste containing free liquids placed in the landfill? _____ Yes, _____ No. If yes, describe containers on comments below.
- 9) Are ignitable or reactive wastes placed in a landfill? _____ Yes, _____ No. If yes: _____ is the waste treated, rendered, or mixed before or immediately after placement in the landfill so that the resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive waste? _____ Are incompatible wastes segregated in different landfill cells?

M. Incinerator/Thermal Treatment (10.51.05.15 & .16)

- 1) Prior to burning waste not previously incinerated or thermally processed, does the operator conduct waste analysis for the following:
 _____ heating value of the waste;
 _____ halogen content and sulfur in the waste;
 _____ concentrations of lead and mercury unless documented data is available which show these elements not to be present?
- 2) Are instruments related to combustion and emission control monitored at least every 15 minutes? _____ Yes, _____ No.
- 3) Is the stack plume observed visually at least hourly for color and opacity? _____ Yes, _____ No, _____ N/A.
- 4) Is the incinerator or thermal process and associated equipment inspected daily for leaks, spills and fugitive emissions? _____ Yes, _____ No.
- 5) Is all of the above information documented in the facility's operating record? _____ Yes, _____ No.

N. Chemical, Physical and Biological Treatment (10.51.05.17)

- 1) Are all treatment processes or equipment in good condition, i.e., no signs of leakage, corrosion or any other deterioration? _____ Yes, _____ No.
- 2) Are treatment processes or equipment with continuous inflow of hazardous waste equipped with a means to stop the inflow? (e.g., waste feed cutoff system or bypass system to a standby containment device) _____ Yes, _____ No.

- 3) Are waste analyses performed or written documentation obtained before placing a substantially different hazardous waste into treatment processes or equipment? _____ Yes, _____ No.
- 4) Is this information recorded in the facility's operating record? _____ Yes, _____ No.
- 5) Are daily inspections conducted for discharge control equipment (e.g., bypass systems, waste feed cutoff systems, drainage systems and pressure relief systems)? _____ Yes, _____ No.
- 6) Is data gathered from monitoring equipment (e.g., pressure and temperature gauges) daily? _____ Yes, _____ No.
- 7) Are construction materials of the treatment process or equipment and the immediate surrounding area inspected weekly for signs of leakage, corrosion or any other deterioration? _____ Yes, _____ No.
- 8) Are the results of these inspections recorded in an inspection log or summary? _____ Yes, _____ No.
- 9) Are ignitable or reactive wastes placed in a treatment process? _____ Yes, _____ No. If yes: _____ Are wastes treated, rendered, or mixed before or immediately after placement in the treatment process or equipment so that the resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive wastes under Section 261.21 or 261.23 of the RCRA Regulations? _____ Are wastes treated in such a way that they are protected from any material or conditions which may cause the waste to ignite or react?
- 10) Are incompatible wastes kept from being placed in the same treatment process or equipment? _____ Yes, _____ No.

O. Permit Requirements (10.51.07)

- 1) Does the facility have a DHS permit for its activity? _____ Yes, _____ No.
 If no, has the facility submitted an application for a DHS permit? _____ Yes, _____ No.
- 2) List any special Permit requirements that are not in full compliance.

Comments: This writer discussed the following with B. Selman: This writer discussed with Ron Lubcher, Hazardous Waste Division, the wastewater which is generated by washing down the electrostatic precipitators. Specifically, the plasticizers which volatilize and are collected by the precipitators. Neither the dioctyl phthalate or the diisodecyl phthalate is listed as a hazardous waste in COMB 10.51.02.14-17. However, diisodecyl phthalate is considered to have moderately toxic + irritant characteristics. It is recommended that the facility receiving the waste oil be advised that it contains an amount of these plasticizers. The waste oil tank, which also contains the plasticizers, is presently pumped and hauled to American Recovery.

This facility last made an off-site shipment (manifested) of waste solvent on 10/13/91. At present, three 55-gallon drums have been stored over 90 days (starting accumulation dates of 10/15, 10/12, 10/15). Four other 55-gallon drums were observed with starting accumulation dates in October, 1991. Mr. Ed Lueck, warehouse Foreman (Shipping department) that MINIMACH (Haver) had been contacted, but MINIMACH explained to this facility that their order, amount in the SF and MO required Jan. 1992, and although they had been contacted, sent two reg. letters to MO, they have not yet received their permit. MINIMACH was informed of facility that as soon as they receive the permit, they will immediately inform + discuss this situation with the MINIMACH while they are in contact with the facility. The facility has been advised of this situation.

Four 55-gallon drums of waste solvent were found this date. All drums were labeled: "Waste Solvent". No other drums were observed.

Address Route 6, Goddard Parkway, Box 14 Salisbury, Maryland Zip 21801

Description of Work Activity Manufacture, Print, and Laminates PVC Film

I. Generators

A. Description (10.51.03.01-03)

- 1) Does the Facility generate or has it accumulated those quantities of hazardous waste described in 10.51.02.05 C? ☒ Yes, ☐ No.
- 2) Has the facility obtained an EPA identification number? ☒ Yes, ☐ No.
- 3) Describe the amount of waste generated. (day, week or month) approx. 1500 gallons/month
- 4) Under which category is the waste(s)?
☒ Ignitable ☐ Reactive ☐ Corrosive
☐ EP Toxic ☒ RCRA Listed FOOS

B. Manifest (10.51.03.04)

- 1) Is Maryland manifest system in operation for off-site shipment? ☒ Yes, ☐ No.
- 2) Is TSD Facility to receive DHS identified by YES Name, YES Address, YES EPA ID Number?
- 3) Is alternate facility identified? ☐ Yes, ☒ No.
- 4) Is generator identified by YES Name, YES Address, YES Telephone Number, YES MD/EPA ID Number?
- 5) Is each transporter identified by YES Name, YES EPA ID Number, YES Maryland Certification Number? Vehicle Cert. No.
- 6) Is waste properly described? ☒ Yes, ☐ No.
- 7) Is shipment date marked? ☒ Yes, ☐ No.
- 8) Is quantity of waste described by Unit of Weight, Volume? described in gallons (CAPACITY)
- 9) Are containers to be loaded identified by YES Type, YES Number?
- 10) Is proper certification noted and signed by generator? ☒ Yes, ☐ No.
- 11) Are adequate copies available for operator, transporter and TSD? ☒ Yes, ☐ No.

C. Pre-Transport Requirements (10.51.03.05)

- 1) Is each container marked with date accumulation began? ☒ Yes, ☐ No. If yes, has any waste been stored over 90 days? ☒ Yes, ☐ No. How much
- 2) Are containers in good condition? ☒ Yes, ☐ No. If no, explain
- 3) Are containers properly labeled? ☒ Yes, ☐ No.
- 4) Does generator have approved emergency contingency plan? ☒ Yes, ☐ No.

D. Recordkeeping and Reporting (10.51.03.06)

- 1) Does the generator have: copies of all signed manifests from the previous three years? ☒ Yes, ☐ No; copies of each Annual Report and Exception Report? ☐ Yes, ☒ No. N/A
- 2) Does the generator retain, for a period of three years, all wastes analyses? ☒ Yes, ☐ No.
- 3) Has the generator filed Exception Reports as required by 10.51.03.06 C? ☐ Yes, ☒ No. N/A

II. Treatment, Storage, Disposal (TSD)

A. Site characterization (10.51.05.02)

- 1) Facility Type
☐ Thermal Treatment ☐ Biological Treatment
☐ Recycling/Recovery ☐ Land Treatment
☐ Waste Oil ☐ Incineration
☐ Chemical Treatment ☐ Landfill Operation
☐ Physical Treatment ☐ Below Ground Tanks
☐ Open Pile ☐ Other
☐ Surface Impoundment
☐ Drums
☐ Above Ground Tank(s)

- 2) Does facility generate DHS? ☐ Yes, ☐ No.
- 3) Does facility have waste analysis plan? ☐ Yes, ☐ No. If yes, are the procedures of that plan being followed? ☐ Yes, ☐ No.
- 4) Can facility personnel identify DHS being handled? ☐ Yes, ☐ No.
- 5) Can facility personnel confirm that DHS received equal those on manifest for it? ☐ Yes, ☐ No.
- 6) Is there a 24-Hour surveillance system to monitor active portion of facility? ☐ Yes, ☐ No. If No, is there an artificial or natural boundary? ☐ Yes, ☐ No. Is there a means to control entry? ☐ Yes, ☐ No. Is there a restricted access sign posted? ☐ Yes, ☐ No.
- 7) Does facility have: ☐ emergency equipment inspection log, ☐ written schedule for inspections, ☐ security devices, operating & structural prevention equipment?
- 8) Have facility personnel completed classroom/on-site training? ☐ Yes, ☐ No. Are records maintained of: ☐ Job titles/names of employees ☐ job descriptions, ☐ Type/amount of continuing training?
- 9) Are general requirements for Ignitable, Reactive or Incompatible Wastes as required in 10.51.05.02 H addressed? ☐ Yes, ☐ No.

B. Preparedness and Prevention (10.51.05.03)

- 1) Facility has the following equipment? ☐ Internal communication/alarm system for on-site personnel, ☐ device for summoning emergency assistance, ☐ adequate fire control equipment, water, & suppression chemicals, ☐ list of aforementioned equipment.
- 2) Does facility have adequate area for emergency movement? ☐ Yes, ☐ No.

C. Contingency Plan and Emergency Procedures (10.51.05.04)

- 1) Does facility have an approved contingency plan for: ☐ Personnel to implement emergency procedures to fire, explosions, and unplanned releases to air, soil and water? ☐ Responding emergency units to provide assistance during emergency situations? ☐ A list of emergency equipment needed to cope with situation?
- 2) Are emergency response coordinators listed by name, address, & phone number? ☐ Yes, ☐ No.
- 3) Is there an evacuation plan if recommended? ☐ Yes, ☐ No.
- 4) Are emergency coordinators available on twenty-four hour basis? ☐ Yes, ☐ No.

D. Manifest System, Recordkeeping, and Reporting (10.51.05.05)

- Facility has a written operating record which contains the following information:
- 1) ☐ description & quantity of DHS received.
 - 2) ☐ method & date of DHS treatment, storage, or disposal.
 - 3) ☐ location & quantity at each DHS location in facility.
 - 4) ☐ detailed records & results of waste analysis & treatability tests performed.
 - 5) ☐ detailed operating summary reports.
 - 6) ☐ description of emergency incidents that required implementation of contingency plan.
 - 7) ☐ records & results of inspections of emergency equipment, TSD systems & hazardous waste areas.
 - 8) Has facility retained, for at least 3 years, copies of all manifests? ☐ Yes, ☐ No.

- 5) Are the following items maintained in the operating record: _____ on a map, the exact location and dimensions, including depth, of each cell with respect to permanently surveyed benchmarks? _____ contents of each cell and approximate location of each hazardous waste type within the cell?
- 6) Are bulk, non-containerized or waste containing free liquids placed in the landfill? _____ Yes, _____ No. If yes: _____ is a leachate collection system available to remove leachate?, and _____ is the liquid stabilized or treated physically or chemically prior to disposal?
- 7) Are empty containers crushed flat or shredded before burial in the landfill? _____ Yes, _____ No.
- 8) Are containers holding liquid wastes (or waste containing free liquids placed in the landfill? _____ Yes, _____ No. If yes, describe containers on comments below.
- 9) Are ignitable or reactive wastes placed in a landfill? _____ Yes, _____ No. If yes: _____ is the waste treated, rendered, or mixed before or immediately after placement in the landfill so that the resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive waste? _____ Are incompatible wastes segregated in different landfill cells?

M. Incinerator/Thermal Treatment (10.51.05.15 & .16)

- 1) Prior to burning waste not previously incinerated or thermally processed, does the operator conduct waste analysis for the following:
 _____ heating value of the waste;
 _____ halogen content and sulfur in the waste;
 _____ concentrations of lead and mercury unless documented data is available which show these elements not to be present?
- 2) Are instruments related to combustion and emission control monitored at least every 15 minutes? _____ Yes, _____ No.
- 3) Is the stack plume observed visually at least hourly for color and opacity? _____ Yes, _____ No, _____ N/A.
- 4) Is the incinerator or thermal process and associated equipment inspected daily for leaks, spills and fugitive emissions? _____ Yes, _____ No.
- 5) Is all of the above information documented in the facility's operating record? _____ Yes, _____ No.

N. Chemical, Physical and Biological Treatment (10.51.05.17)

- 1) Are all treatment processes or equipment in good condition, i.e., no signs of leakage, corrosion or any other deterioration? _____ Yes, _____ No.
- 2) Are treatment processes or equipment with continuous inflow of hazardous waste equipped with a means to stop the inflow? (e.g., waste feed cutoff system or bypass system to a standby containment device) _____ Yes, _____ No.

- 3) Are waste analyses performed or written documentation obtained before placing a substantially different hazardous waste into treatment processes or equipment? _____ Yes, _____ No.
- 4) Is this information recorded in the facility's operating record? _____ Yes, _____ No.
- 5) Are daily inspections conducted for discharge control equipment (e.g., bypass systems, waste feed cutoff systems, drainage systems and pressure relief systems)? _____ Yes, _____ No.
- 6) Is data gathered from monitoring equipment (e.g., pressure and temperature gauges) daily? _____ Yes, _____ No.
- 7) Are construction materials of the treatment process or equipment and the immediate surrounding area inspected weekly for signs of leakage, corrosion or any other deterioration? _____ Yes, _____ No.
- 8) Are the results of these inspections recorded in an inspection log or summary? _____ Yes, _____ No.
- 9) Are ignitable or reactive wastes placed in a treatment process? _____ Yes, _____ No. If yes:
 _____ Are wastes treated, rendered, or mixed before or immediately after placement in the treatment process or equipment so that the resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive wastes under Section 261.21 or 261.23 of the RCRA Regulations?
 _____ Are wastes treated in such a way that they are protected from any material or conditions which may cause the waste to ignite or react?
- 10) Are incompatible wastes kept from being placed in the same treatment process or equipment? _____ Yes, _____ No.

O. Permit Requirements (10.51.07)

- 1) Does the facility have a DHS permit for its activity? _____ Yes, _____ No.
 If no, has the facility submitted an application for a DHS permit? _____ Yes, _____ No.
- 2) List any special Permit requirements that are not in full compliance.

Comments: The above facility closed down the calender operation in January 1992. Therefore, the calender unit, the electrostatic precipitators, and the cooling tower are not in operation. Just the printing plant portion is operating. Waste Solvent Storage Area: 21 DRUMS of waste solvent were present, all up on pallets, no leakage observed, containers in good condition, however, one DRUM did not exhibit a Hazardous Waste Label. This facility shall place the proper hazardous waste label on this drum immediately. The earliest starting accumulation date observed was 01/29/82. Inspection of the manifests of the most recent off-site shipment (NOTES): 1/27/82 - Waste Solvent, Not Flammable, Methyl Ethyl Ketone Liquid, F005, 2750 gallons, 55 DR, Hauler - Marisol, Inc, Facility - Marisol, Inc. 3/25/82 - Waste Solvent, Not Flammable, Methyl Ethyl Ketone Lq, 4000 gal, 80 DR, F005 conc 99.9, HAULER - Marisol, Inc, FACILITY - Marisol, Inc.

Inspector's Name: W. Fortune Title: Waste Mgmt Admin - Inspector

Facility Location: HOOKEE CHEMICAL - Salisbury Plant - Graceland Pkwy - Salisbury, MD

I. Generators

A. Description (10.51.03.01-03)

- 1) Does the Facility generate or has it accumulated those quantities of hazardous waste described in 10.51.02.05 C? ☒ Yes, ☐ No.
- 2) Has the facility obtained an EPA identification number? ☒ Yes, ☐ No.
- 3) Describe the amount of waste generated. (day, week or month) approx 975 gallons/month
- 4) Under which category is the waste(s)? ☒ Ignitable ☐ Reactive ☐ Corrosive ☐ EP Toxic ☒ RCRA Listed FOOS

B. Manifest (10.51.03.04)

- 1) Is Maryland manifest system in operation for off-site shipment? ☒ Yes, ☐ No.
- 2) Is TSD Facility to receive DHS identified by YES Name, YES Address, YES EPA ID Number?
- 3) Is alternate facility identified? ☐ Yes, ☒ No.
- 4) Is generator identified by YES Name, YES Address, YES Telephone Number, YES MD/EPA ID Number?
- 5) Is each transporter identified by YES Name, YES EPA ID Number, YES Maryland Certification Number? Vehicle Cert. No. 9
- 6) Is waste properly described? ☒ Yes, ☐ No.
- 7) Is shipment date marked? ☒ Yes, ☐ No.
- 8) Is quantity of waste described by Unit of Weight, Volume? described in gallons (capacity)
- 9) Are containers to be loaded identified by ☒ Type, ☐ Number?
- 10) Is proper certification noted and signed by generator? ☒ Yes, ☐ No.
- 11) Are adequate copies available for operator, transporter and TSD? ☒ Yes, ☐ No.

C. Pre-Transport Requirements (10.51.03.05)

- 1) Is each container marked with date accumulation began? ☒ Yes, ☐ No. If yes, has any waste been stored over 90 days? ☒ Yes, ☐ No. How much three 55-gallon drums
- 2) Are containers in good condition? ☒ Yes, ☐ No. If no, explain _____
- 3) Are containers properly labeled? ☒ Yes, ☐ No.
- 4) Does generator have approved emergency contingency plan? ☒ Yes, ☐ No.

D. Recordkeeping and Reporting (10.51.03.06)

- 1) Does the generator have: copies of all signed manifests from the previous three years? ☒ Yes, ☐ No; copies of each Annual Report and Exception Report? ☐ Yes, ☐ No. N/A
- 2) Does the generator retain, for a period of three years, all wastes analyses? ☐ Yes, ☐ No. waste is listed
- 3) Has the generator filed Exception Reports as required by 10.51.03.06 C? ☐ Yes, ☐ No. N/A

II. Treatment, Storage, Disposal (TSD)

- 2) Does facility generate DHS? ☐ Yes, ☐ No.
- 3) Does facility have waste analysis plan? ☐ Yes, ☐ No. If yes, are the procedures of that plan being followed? ☐ Yes, ☐ No.
- 4) Can facility personnel identify DHS being handled? ☐ Yes, ☐ No.
- 5) Can facility personnel confirm that DHS received equal those on manifest for.n? ☐ Yes, ☐ No.
- 6) Is there a 24-Hour surveillance system to monitor active portion of facility? ☐ Yes, ☐ No. If No, is there an artificial or natural boundary? ☐ Yes, ☐ No. Is there a means to control entry? ☐ Yes, ☐ No. Is there a restricted access sign posted? ☐ Yes, ☐ No.
- 7) Does facility have: ☐ emergency equipment inspection log, ☐ written schedule for inspections, ☐ security devices, operating & structural prevention equipment?
- 8) Have facility personnel completed classroom/on-site training? ☐ Yes, ☐ No. Are records maintained of: ☐ Job titles/names of employees ☐ job descriptions, ☐ Type/amount of continuing training?
- 9) Are general requirements for Ignitable, Reactive or Incompatible Wastes as required in 10.51.05.02 H addressed? ☐ Yes, ☐ No.

B. Preparedness and Prevention (10.51.05.03)

- 1) Facility has the following equipment? ☐ Internal communication/alarm system for on-site personnel, ☐ device for summoning emergency assistance, ☐ adequate fire control equipment, water, & suppression chemicals, ☐ list of aforementioned equipment.
- 2) Does facility have adequate area for emergency movement? ☐ Yes, ☐ No.

C. Contingency Plan and Emergency Procedures (10.51.05.04)

- 1) Does facility have an approved contingency plan for: ☐ Personnel to implement emergency procedures to fire, explosions, and unplanned releases to air, soil and water? ☐ Responding emergency units to provide assistance during emergency situations? ☐ A list of emergency equipment needed to cope with situation?
- 2) Are emergency response coordinators listed by name, address, & phone number? ☐ Yes, ☐ No.
- 3) Is there an evacuation plan if recommended? ☐ Yes, ☐ No.
- 4) Are emergency coordinators available on twenty-four hour basis? ☐ Yes, ☐ No.

D. Manifest System, Recordkeeping, and Reporting (10.51.05.05)

- Facility has a written operating record which contains the following information:
- ☐ description & quantity of DHS received.
 - ☐ method & date of DHS treatment, storage, or disposal.
 - ☐ location & quantity at each DHS location in facility.
 - ☐ detailed records & results of waste analysis & treatability tests performed.
 - ☐ detailed operating summary reports.
 - ☐ description of emergency incidents that required implementation of contingency plan.
 - ☐ records & results of inspections of emergency equipment, TSD systems & hazardous waste areas.
 - Has facility retained, for at least 3 years, copies of all manifests? ☐ Yes, ☐ No.

This facility is a GENERATOR ∴ Page not applicable.

E. Groundwater Monitoring (10.51.05.06)

- 1) Has facility implemented a groundwater monitoring program? ☐ Yes, ☐ No, ☐ N/A.
- 2) Are samples from the groundwater monitoring system being analyzed according to the groundwater sampling and analyses plan? ☐ Yes, ☐ No.
- 3) Is this plan set up in accordance with 10.51.05.06 C? ☐ Yes, ☐ No.
- 4) Has groundwater quality assessment program been prepared? ☐ Yes, ☐ No.
- 5) Are proper groundwater sampling and analyses records kept? ☐ Yes, ☐ No.
- 6) Are the necessary reports on groundwater monitoring information being forwarded to the Secretary? ☐ Yes, ☐ No.
- 7) Do the reports match the facility records? ☐ Yes, ☐ No.

F. Closure, Post-closure, and Financial Requirement (10.51.05.07 & .08)

- 1) Does the facility have an approved closure plan that meets the financial requirements? ☐ Yes, ☐ No.
- 2) For surface impoundments, land treatment, and landfills, does the facility have an approved post-closure plan that meets the financial requirements? ☐ Yes, ☐ No.
- 3) Does facility maintain liability insurance? ☐ Yes, ☐ No.

G. Container Management (10.51.05.09)

- 1) Are all containers: (a) ☐ in good condition, i.e., no signs of leakage, corrosion, or any other deterioration/deformation; (b) ☐ lined or made of compatible material such that hazardous wastes placed into them will not result in reaction or corrosion; (c) ☐ sealed during storage.
- 2) Are storage areas for hazardous waste containers inspected by owner/operator at least once a week? ☐ Yes, ☐ No.
- 3) Is an inspection log maintained? ☐ Yes, ☐ No.
- 4) Are containers holding ignitable or reactive waste located at least 50 feet from the facility's property line? ☐ Yes, ☐ No.
- 5) Are incompatible wastes placed in separate containers? ☐ Yes, ☐ No.
- 6) Are storage containers holding hazardous wastes which are incompatible with nearby materials stored in containers, tanks, piles, or surface impoundments separated by dikes, berms, walls, or other devices? ☐ Yes, ☐ No.

H. Tanks (10.51.05.10)

- 1) Are all tanks in good condition, i.e., no signs of leakage, corrosion, or any other deterioration? ☐ Yes, ☐ No.
- 2) Are uncovered tanks operated to ensure a minimum of two feet of freeboard? ☐ Yes, ☐ No.
If not, is tank equipped with a containment structure (e.g., dike or trench), a drainage control system, or a diversion structure (e.g., standby tank) with a capacity that equals or exceeds the volume of top 2 ft. of the tank? ☐ Yes, ☐ No.
- 3) Are tanks with continuous inflow of hazardous waste equipped with a means to stop this inflow (e.g., waste feed cut-off system or by-pass to a standby tank)? ☐ Yes, ☐ No.
- 4) Are waste analyses conducted or written documentation obtained before placing a substantially different hazardous waste into tank used for storage or treatment? ☐ Yes, ☐ No.
- 5) Are daily inspections conducted for discharge control equipment (e.g., by-pass systems, waste feed cut-off systems and drainage systems)? ☐ Yes, ☐ No.
- 6) Is data gathered from monitoring equipment (e.g., pressure and temperature gauges) at least once each operating day? ☐ Yes, ☐ No.
- 7) Is the level of waste in the tank checked at least once each operating day? ☐ Yes, ☐ No.
- 8) Is (are) the tank(s) inspected weekly to detect corrosion or leaking of fixtures or seams? ☐ Yes, ☐ No.
- 9) Are the results of these inspections recorded in an inspection log or summary? ☐ Yes, ☐ No.
- 10) Are ignitable or reactive wastes stored in tanks? ☐ Yes, ☐ No. If yes:
 - a) Is the waste treated, rendered, or mixed before or immediately after placement in the tank so that the resulting waste, mixture, or dissolution of materials no longer meets the definition of ignitable or reactive wastes under Parts 261.21 or 261.23 of the RCRA Regulations? ☐ Yes, ☐ No.

- b) Is waste stored or treated in such a way that it is protected from material or conditions which may cause the waste to ignite or react? ☐ Yes, ☐ No.
- c) Is owner/operator of a facility which treats or stores ignitable or reactive wastes in covered tanks in compliance with the National Fire Protection Association's (NEPA's) buffer zone requirements for tanks contained in tables 2-1 through 2-6 of the "Flammable and Combustible Code—1977"? ☐ Yes, ☐ No.

I. Surface Impoundments (10.51.05.11)

- 1) Is two feet of freeboard maintained in the surface impoundment? ☐ Yes, ☐ No.
- 2) Do all earthen dikes have protective covers (e.g., grass, shale or rock) to minimize wind and water erosion and to preserve dike structural integrity? ☐ Yes, ☐ No.
- 3) Are waste analyses conducted or written documentation obtained before placing a substantially different hazardous waste into a surface impoundment used for storage or treatment? ☐ Yes, ☐ No.
- 4) Is the freeboard level inspected daily? ☐ Yes, ☐ No.
- 5) Is the surface impoundment, including dikes and vegetation, inspected weekly to detect leaks, deterioration, or failures in the impoundment? ☐ Yes, ☐ No.
- 6) Are the results of these inspections recorded in an inspection log or summary? ☐ Yes, ☐ No.
- 7) Are ignitable or reactive wastes stored in a surface impoundment? ☐ Yes, ☐ No. If yes:
 - a) Is the waste treated, rendered, or mixed before or immediately after placement in the impoundment so that the resulting waste, mixture or dissolution of material no longer meets the definition of ignitable or reactive waste under Parts 261.21 or 261.23 of the RCRA Regulations? ☐ Yes, ☐ No.
 - b) Are incompatible wastes segregated in separate surface impoundments so that spontaneous reactions are avoided? ☐ Yes, ☐ No.

J. Waste Pile (10.51.05.12)

- 1) Is wind dispersal of the pile controlled? ☐ Yes, ☐ No, ☐ Not Needed.
- 2) Are additions to the pile being analyzed prior to adding them to the pile? ☐ Yes, ☐ No.
- 3) Is hazardous waste leachate or runoff collected? ☐ Yes, ☐ No. Is the pile protected from precipitation and runoff? ☐ Yes, ☐ No.
- 4) Are ignitable or reactive wastes protected from materials or conditions that might cause it to ignite or react? ☐ Yes, ☐ No, ☐ N/A.
- 5) Are incompatible wastes hauled in a manner as to assure separation? ☐ Yes, ☐ No, ☐ N/A.

K. Land Treatment (10.51.05.13)

- 1) Will the use of land treatment result in the waste being less hazardous or non-hazardous? ☐ Yes, ☐ No.
- 2) Is run-on diverted away from the active portion of the facility? ☐ Yes, ☐ No. Is run-off from the active portion of the facility collected? ☐ Yes, ☐ No.
- 3) Has the proper waste analyses been performed? ☐ Yes, ☐ No.
- 4) If food chain crops are to be grown on the active portion of the facility has the necessary documentation required been provided? ☐ Yes, ☐ No.
- 5) Has the owner/operator written and implemented an unsaturated zone monitoring plan? ☐ Yes, ☐ No.
- 6) Have the additional requirements for a closure and post-closure plan been addressed? ☐ Yes, ☐ No.
- 7) Are ignitable or reactive wastes immediately incorporated into the soil? ☐ Yes, ☐ No.
- 8) Are incompatible wastes hauled according to 10.51.05.13 I? ☐ Yes, ☐ No.

L. Landfills (10.51.05.14)

- 1) Is run-on diverted away from the facility's active portions? ☐ Yes, ☐ No.
- 2) Is run-off collected from the landfill's active portions? ☐ Yes, ☐ No.
- 3) Has a hazardous waste determination been made on the run-off? (Identification and Listing of Hazardous Waste) ☐ Yes, ☐ No.
- 4) Is the landfill managed so as to control wind dispersal? ☐ Yes, ☐ No.

- 5) Are the following items maintained in the operating record: _____ on a map, the exact location and dimensions, including depth, of each cell with respect to permanently surveyed benchmarks? _____ contents of each cell and approximate location of each hazardous waste type within the cell?
- 6) Are bulk, non-containerized or waste containing free liquids placed in the landfill? _____ Yes, _____ No. If yes: _____ is a leachate collection system available to remove leachate?, and _____ is the liquid stabilized or treated physically or chemically prior to disposal?
- 7) Are empty containers crushed flat or shredded before burial in the landfill? _____ Yes, _____ No.
- 8) Are containers holding liquid wastes (or waste containing free liquids placed in the landfill? _____ Yes, _____ No. If yes, describe containers on comments below.
- 9) Are ignitable or reactive wastes placed in a landfill? _____ Yes, _____ No. If yes: _____ is the waste treated, rendered, or mixed before or immediately after placement in the landfill so that the resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive waste? _____ Are incompatible wastes segregated in different landfill cells?

M. Incinerator/Thermal Treatment (10.51.05.15 & 16)

- 1) Prior to burning waste not previously incinerated or thermally processed, does the operator conduct waste analysis for the following:
 _____ heating value of the waste;
 _____ halogen content and sulfur in the waste;
 _____ concentrations of lead and mercury unless documented data is available which show these elements not to be present?
- 2) Are instruments related to combustion and emission control monitored at least every 15 minutes? _____ Yes, _____ No.
- 3) Is the stack plume observed visually at least hourly for color and opacity? _____ Yes, _____ No, _____ N/A.
- 4) Is the incinerator or thermal process and associated equipment inspected daily for leaks, spills and fugitive emissions? _____ Yes, _____ No.
- 5) Is all of the above information documented in the facility's operating record? _____ Yes, _____ No.

N. Chemical, Physical and Biological Treatment (10.51.05.17)

- 1) Are all treatment processes or equipment in good condition, i.e., no signs of leakage, corrosion or any other deterioration? _____ Yes, _____ No.
- 2) Are treatment processes or equipment with continuous inflow of hazardous waste equipped with a means to stop the inflow? (e.g., waste feed cutoff system or bypass system to a standby containment device) _____ Yes, _____ No.

- 3) Are waste analyses performed or written documentation obtained before placing a substantially different hazardous waste into treatment processes or equipment? _____ Yes, _____ No.
- 4) Is this information recorded in the facility's operating record? _____ Yes, _____ No.
- 5) Are daily inspections conducted for discharge control equipment (e.g., bypass systems, waste feed cutoff systems, drainage systems and pressure relief systems)? _____ Yes, _____ No.
- 6) Is data gathered from monitoring equipment (e.g., pressure and temperature gauges) daily? _____ Yes, _____ No.
- 7) Are construction materials of the treatment process or equipment and the immediate surrounding area inspected weekly for signs of leakage, corrosion or any other deterioration? _____ Yes, _____ No.
- 8) Are the results of these inspections recorded in an inspection log or summary? _____ Yes, _____ No.
- 9) Are ignitable or reactive wastes placed in a treatment process? _____ Yes, _____ No. If yes:
 Are wastes treated, rendered, or mixed before or immediately after placement in the treatment process or equipment so that the resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive wastes under Section 261.21 or 261.23 of the RCRA Regulations?
 Are wastes treated in such a way that they are protected from any material or conditions which may cause the waste to ignite or react?
- 10) Are incompatible wastes kept from being placed in the same treatment process or equipment? _____ Yes, _____ No.

O. Permit Requirements (10.51.07)

- 1) Does the facility have a DHS permit for its activity?
 _____ Yes, _____ No.
 If no, has the facility submitted an application for a DHS permit? _____ Yes, _____ No.
- 2) List any special Permit requirements that are not in full compliance.

Comments: This writer discussed the following with B. Seldemridge: This writer discussed with Ron Lubcher, Hazardous Waste Division, the wastewater which is generated by washing down the electrostatic precipitators. Specifically, the plasticizers which volatilize and are collected by the precipitators. Neither the dioctyl phthalate or the diisodecyl phthalate is listed as a hazardous waste in COMAR 10.51.03.14 - 17. However, diisodecyl phthalate is considered to have moderately toxic + irritant characteristics. It is recommended that the facility receiving the waste oil be briefed that it contains an amount of these plasticizers. The waste oil tank, which also contains the plasticizers, is presently pumped and hauled to American Recovery.

This facility last made an off-site shipment (manifested) of waste solvent on 10/13/91. At present, three 55-gallon drums have been stored over 90 days (starting accumulation dates of 10/15, 10/12, 10/15). Four other 55-gallon drums were observed with starting accumulation dates in October, 1991. Mr. Ed Weirich, warehouse Foreman/Shipping explained that MARISOL (Hauler) had been contacted, but MARISOL explained to this facility that their haulers permit in the ST of MD expired Jan 1, 1992, and although they have applied for renewal + sent two reg. letters to MD, they have not yet received their permit. MARISOL has informed the facility that as soon as they receive their permit, Hauler is first on their list. This writer will immediately inform + discuss this situation with the HAZARDOUS WASTE Division (and discuss it again with this facility before the end of this week).

Forty-eight drums of waste solvent were stored this date. All drums were labelled + all but one drum had the starting accumulation date (this should be immediately corrected). No leakage or spillage was observed.

Inspector's Name: W. Fortune

Title: Waste Mgmt. Admin. - Inspector

Facility Location: Goddard Parkway Salisbury, Maryland

Facility Rep. present during inspection: B. Seldemridge Date: Nov. 01, 1991

Description of Work Activity Manufacture, Print, and Laminate PVC Film

I. Generators

A. Description (10.51.03.01-.03)

- 1) Does the Facility generate or has it accumulated those quantities of hazardous waste described in 10.51.02.05 C?
☒ Yes, ☐ No.
- 2) Has the facility obtained an EPA identification number?
☒ Yes, ☐ No.
- 3) Describe the amount of waste generated. (day, week or month)
approx 1500 gallons/month
- 4) Under which category is the waste(s)?
☒ Ignitable ☐ Reactive ☐ Corrosive
☐ EP Toxic ☒ RCRA Listed FOOS

B. Manifest (10.51.03.04)

- 1) Is Maryland manifest system in operation for off-site shipment? ☒ Yes, ☐ No.
- 2) Is TSD Facility to receive DHS identified by NO Name, YES Address, YES EPA ID Number? NAME, NOT IN GENERATOR SECTION
- 3) Is alternate facility identified? ☐ Yes, ☒ No.
- 4) Is generator identified by YES Name, YES Address, YES Telephone Number, YES MD/EPA ID Number? VEH. CERT. NO.
- 5) Is each transporter identified by YES Name, YES EPA ID Number, YES Maryland Certification Number?
- 6) Is waste properly described? ☒ Yes, ☐ No.
- 7) Is shipment date marked? ☒ Yes, ☐ No.
- 8) Is quantity of waste described by YES Unit of Weight, YES Volume? QUANTITY GALLONS
- 9) Are containers to be loaded identified by YES Type, YES Number?
- 10) Is proper certification noted and signed by generator? ☒ Yes, ☐ No.
- 11) Are adequate copies available for operator, transporter and TSD? ☒ Yes, ☐ No.

C. Pre-Transport Requirements (10.51.03.05)

- 1) Is each container marked with date accumulation began? ☒ Yes, ☐ No. If yes, has any waste been stored over 90 days? ☐ Yes, ☒ No. How much _____
- 2) Are containers in good condition? ☒ Yes, ☐ No. If no, explain _____
- 3) Are containers properly labeled? ☒ Yes, ☐ No.
- 4) Does generator have approved emergency contingency plan? ☒ Yes, ☐ No.

D. Recordkeeping and Reporting (10.51.03.06)

- 1) Does the generator have: copies of all signed manifests from the previous three years? ☒ Yes, ☐ No;
N/A copies of each Annual Report and Exception Report? ☐ Yes, ☐ No. FACILITY HAS NOT FILED AN ANNUAL REPORT
- 2) Does the generator retain, for a period of three years, all report wastes analyses? ☐ Yes, ☐ No. SEE COMMENTS
- 3) Has the generator filed Exception Reports as required by 10.51.03.06 C? ☐ Yes, ☐ No. N/A

II. Treatment, Storage, Disposal (TSD)

A. Site characterization (10.51.05.02)

- 1) Facility Type
☐ Thermal Treatment ☐ Biological Treatment
☐ Recycling/Recovery ☐ Land Treatment
☐ Waste Oil ☐ Incineration
☐ Chemical Treatment ☐ Landfill Operation
☐ Physical Treatment ☐ Below Ground Tanks
☐ Open Pile ☐ Other _____
☐ Surface Impoundment _____
☐ Drums _____
☐ Above Ground Tank(s) _____

- 2) Does facility generate DHS? ☐ Yes, ☒ No.
- 3) Does facility have waste analysis plan? ☒ Yes, ☐ No. If yes, are the procedures of that plan being followed? ☐ Yes, ☐ No.
- 4) Can facility personnel identify DHS being handled? ☐ Yes, ☐ No.
- 5) Can facility personnel confirm that DHS received equal those on manifest for on? ☐ Yes, ☐ No.
- 6) Is there a 24-Hour surveillance system to monitor active portion of facility? ☐ Yes, ☐ No. If No, is there an artificial or natural boundary? ☐ Yes, ☐ No. Is there a means to control entry? ☐ Yes, ☐ No. Is there a restricted access sign posted? ☐ Yes, ☐ No.

- 7) Does facility have: _____ emergency equipment inspection log, _____ written schedule for inspections, _____ security devices, operating & structural prevention equipment?
- 8) Have facility personnel completed classroom/on-site training? ☒ Yes, ☐ No. Are records maintained of: YES Job titles/names of employees, YES job descriptions, YES Type/amount of continuing training? General description of duty with regard to DHS
- 9) Are general requirements for Ignitable, Reactive or Incompatible Wastes as required in 10.51.05.02 H addressed? ☐ Yes, ☐ No. SEE COMMENTS

B. Preparedness and Prevention (10.51.05.03)

- 1) Facility has the following equipment? YES Internal communication/alarm system for on-site personnel, YES device for summoning emergency assistance, YES adequate fire control equipment, water, & suppression chemicals, YES list of aforementioned equipment.
- 2) Does facility have adequate area for emergency movement? ☒ Yes, ☐ No.

C. Contingency Plan and Emergency Procedures (10.51.05.04)

- 1) Does facility have an approved contingency plan for: YES Personnel to implement emergency procedures to fire, explosions, and unplanned releases to air, soil and water? YES Responding emergency units to provide assistance during emergency situations? YES A list of emergency equipment needed to cope with situation?
- 2) Are emergency response coordinators listed by name, address, & phone number? ☒ Yes, ☐ No. NOT ADDRESS
- 3) Is there an evacuation plan if recommended? ☒ Yes, ☐ No.
- 4) Are emergency coordinators available on twenty-four hour basis? ☒ Yes, ☐ No.

D. Manifest System, Recordkeeping, and Reporting (10.51.05.05)

- Facility has a written operating record which contains the following information:
- 1) _____ description & quantity of DHS received.
 - 2) _____ method & date of DHS treatment, storage, or disposal.
 - 3) _____ location & quantity at each DHS location in facility.
 - 4) _____ detailed records & results of waste analysis & treatment tests performed.
 - 5) _____ detailed operating summary reports.
 - 6) _____ description of emergency incidents that required implementation of contingency plan.
 - 7) _____ records & results of inspections of emergency equipment, TSD systems & hazardous waste areas.
 - 8) Has facility retained, for at least 3 years, copies of all manifests? ☐ Yes, ☐ No.

THIS FACILITY IS A GENERATOR

PAGE (2) IS NOT APPLICABLE

(2)

E. Groundwater Monitoring (10.51.05.06)

- 1) Has facility implemented a groundwater monitoring program? ☐ Yes, ☐ No, ☐ N/A.
- 2) Are samples from the groundwater monitoring system being analyzed according to the groundwater sampling and analyses plan? ☐ Yes, ☐ No.
- 3) Is this plan set up in accordance with 10.51.05.06 C? ☐ Yes, ☐ No.
- 4) Has groundwater quality assessment program been prepared? ☐ Yes, ☐ No.
- 5) Are proper groundwater sampling and analyses records kept? ☐ Yes, ☐ No.
- 6) Are the necessary reports on groundwater monitoring information being forwarded to the Secretary? ☐ Yes, ☐ No.
- 7) Do the reports match the facility records? ☐ Yes, ☐ No.

F. Closure, Post-closure, and Financial Requirement (10.51.05.07 & .08)

- 1) Does the facility have an approved closure plan that meets the financial requirements? ☐ Yes, ☐ No.
- 2) For surface impoundments, land treatment, and landfills, does the facility have an approved post-closure plan that meets the financial requirements? ☐ Yes, ☐ No.
- 3) Does facility maintain liability insurance? ☐ Yes, ☐ No.

G. Container Management (10.51.05.09)

- 1) Are all containers: (a) ☐ in good condition, i.e., no signs of leakage, corrosion, or any other deterioration/deformation; (b) ☐ lined or made of compatible material such that hazardous wastes placed into them will not result in reaction or corrosion; (c) ☐ sealed during storage.
- 2) Are storage areas for hazardous waste containers inspected by owner/operator at least once a week? ☐ Yes, ☐ No.
- 3) Is an inspection log maintained? ☐ Yes, ☐ No.
- 4) Are containers holding ignitable or reactive waste located at least 50 feet from the facility's property line? ☐ Yes, ☐ No.
- 5) Are incompatible wastes placed in separate containers? ☐ Yes, ☐ No.
- 6) Are storage containers holding hazardous wastes which are incompatible with nearby materials stored in containers, tanks, piles, or surface impoundments separated by dikes, berms, walls, or other devices? ☐ Yes, ☐ No.

H. Tanks (10.51.05.10)

- 1) Are all tanks in good condition, i.e., no signs of leakage, corrosion, or any other deterioration: ☐ Yes, ☐ No.
- 2) Are uncovered tanks operated to ensure a minimum of two feet of freeboard? ☐ Yes, ☐ No.
If not, is tank equipped with a containment structure (e.g., dike or trench), a drainage control system, or a diversion structure (e.g., standby tank) with a capacity that equals or exceeds the volume of top 2 ft. of the tank? ☐ Yes, ☐ No.
- 3) Are tanks with continuous inflow of hazardous waste equipped with a means to stop this inflow (e.g., waste feed cut-off system or by-pass to a standby tank)? ☐ Yes, ☐ No.
- 4) Are waste analyses conducted or written documentation obtained before placing a substantially different hazardous waste into tank used for storage or treatment? ☐ Yes, ☐ No.
- 5) Are daily inspections conducted for discharge control equipment (e.g., by-pass systems, waste feed cut-off systems and drainage systems)? ☐ Yes, ☐ No.
- 6) Is data gathered from monitoring equipment (e.g., pressure and temperature gauges) at least once each operating day? ☐ Yes, ☐ No.
- 7) Is the level of waste in the tank checked at least once each operating day? ☐ Yes, ☐ No.
- 8) Is (are) the tank(s) inspected weekly to detect corrosion or leaking of fixtures or seams? ☐ Yes, ☐ No.
- 9) Are the results of these inspections recorded in an inspection log or summary? ☐ Yes, ☐ No.
- 10) Are ignitable or reactive wastes stored in tanks? ☐ Yes, ☐ No. If yes:
a) Is the waste treated, rendered, or mixed before or immediately after placement in the tank so that the resulting waste, mixture, or dissolution of materials no longer meets the definition of ignitable or reactive wastes under Parts 261.21 or 261.23 of the RCRA Regulations? ☐ Yes, ☐ No.

- b) Is waste stored or treated in such a way that it is protected from material or conditions which may cause the waste to ignite or react? ☐ Yes, ☐ No.
- c) Is owner/operator of a facility which treats or stores ignitable or reactive wastes in covered tanks in compliance with the National Fire Protection Association's (NEPA's) buffer zone requirements for tanks contained in tables 2-1 through 2-6 of the "Flammable and Combustible Code—1977"? ☐ Yes, ☐ No.

I. Surface Impoundments (10.51.05.11)

- 1) Is two feet of freeboard maintained in the surface impoundment? ☐ Yes, ☐ No.
- 2) Do all earthen dikes have protective covers (e.g., grass, shale or rock) to minimize wind and water erosion and to preserve dike structural integrity? ☐ Yes, ☐ No.
- 3) Are waste analyses conducted or written documentation obtained before placing a substantially different hazardous waste into a surface impoundment used for storage or treatment? ☐ Yes, ☐ No.
- 4) Is the freeboard level inspected daily? ☐ Yes, ☐ No.
- 5) Is the surface impoundment, including dikes and vegetation, inspected weekly to detect leaks, deterioration, or failures in the impoundment? ☐ Yes, ☐ No.
- 6) Are the results of these inspections recorded in an inspection log or summary? ☐ Yes, ☐ No.
- 7) Are ignitable or reactive wastes stored in a surface impoundment? ☐ Yes, ☐ No. If yes:
a) Is the waste treated, rendered, or mixed before or immediately after placement in the impoundment so that the resulting waste, mixture or dissolution of material no longer meets the definition of ignitable or reactive waste under Parts 261.21 or 261.23 of the RCRA Regulations? ☐ Yes, ☐ No.
- b) Are incompatible wastes segregated in separate surface impoundments so that spontaneous reactions are avoided? ☐ Yes, ☐ No.

J. Waste Pile (10.51.05.12)

- 1) Is wind dispersal of the pile controlled? ☐ Yes, ☐ No, ☐ Not Needed.
- 2) Are additions to the pile being analyzed prior to adding them to the pile? ☐ Yes, ☐ No.
- 3) Is hazardous waste leachate or runoff collected? ☐ Yes, ☐ No. Is the pile protected from precipitation and runoff? ☐ Yes, ☐ No.
- 4) Are ignitable or reactive wastes protected from materials or conditions that might cause it to ignite or react? ☐ Yes, ☐ No, ☐ N/A.
- 5) Are incompatible wastes hauled in a manner as to assure separation? ☐ Yes, ☐ No, ☐ N/A.

K. Land Treatment (10.51.05.13)

- 1) Will the use of land treatment result in the waste being less hazardous or non-hazardous? ☐ Yes, ☐ No.
- 2) Is run-on diverted away from the active portion of the facility? ☐ Yes, ☐ No. Is run-off from the active portion of the facility collected? ☐ Yes, ☐ No.
- 3) Has the proper waste analyses been performed? ☐ Yes, ☐ No.
- 4) If food chain crops are to be grown on the active portion of the facility has the necessary documentation required been provided? ☐ Yes, ☐ No.
- 5) Has the owner/operator written and implemented an unsaturated zone monitoring plan? ☐ Yes, ☐ No.
- 6) Have the additional requirements for a closure and post-closure plan been addressed? ☐ Yes, ☐ No.
- 7) Are ignitable or reactive wastes immediately incorporated into the soil? ☐ Yes, ☐ No.
- 8) Are incompatible wastes hauled according to 10.51.05.13 I? ☐ Yes, ☐ No.

L. Landfills (10.51.05.14)

- 1) Is run-on diverted away from the facility's active portions? ☐ Yes, ☐ No.
- 2) Is run-off collected from the landfill's active portions? ☐ Yes, ☐ No.
- 3) Has a hazardous waste determination been made on the run-off? (Identification and Listing of Hazardous Waste) ☐ Yes, ☐ No.
- 4) Is the landfill managed so as to control wind dispersal? ☐ Yes, ☐ No.

- 5) Are the following items maintained in the operating record: _____ on a map, the exact location and dimensions, including depth, of each cell with respect to permanently surveyed benchmarks? _____ contents of each cell and approximate location of each hazardous waste type within the cell?
- 6) Are bulk, non-containerized or waste containing free liquids placed in the landfill? _____ Yes, _____ No. If yes: _____ is a leachate collection system available to remove leachate?, and _____ is the liquid stabilized or treated physically or chemically prior to disposal?
- 7) Are empty containers crushed flat or shredded before burial in the landfill? _____ Yes, _____ No.
- 8) Are containers holding liquid wastes (or waste containing free liquids placed in the landfill? _____ Yes, _____ No. If yes, describe containers on comments below.
- 9) Are ignitable or reactive wastes placed in a landfill? _____ Yes, _____ No. If yes: _____ is the waste treated, rendered, or mixed before or immediately after placement in the landfill so that the resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive waste? _____ Are incompatible wastes segregated in different landfill cells?

M. Incinerator/Thermal Treatment (10.51.05.15 & .16)

- 1) Prior to burning waste not previously incinerated or thermally processed, does the operator conduct waste analysis for the following:
 _____ heating value of the waste;
 _____ halogen content and sulfur in the waste;
 _____ concentrations of lead and mercury unless documented data is available which show these elements not to be present?
- 2) Are instruments related to combustion and emission control monitored at least every 15 minutes? _____ Yes, _____ No.
- 3) Is the stack plume observed visually at least hourly for color and opacity? _____ Yes, _____ No, _____ N/A.
- 4) Is the incinerator or thermal process and associated equipment inspected daily for leaks, spills and fugitive emissions? _____ Yes, _____ No.
- 5) Is all of the above information documented in the facility's operating record? _____ Yes, _____ No.

N. Chemical, Physical and Biological Treatment (10.51.05.17)

- 1) Are all treatment processes or equipment in good condition, i.e., no signs of leakage, corrosion or any other deterioration? _____ Yes, _____ No.
- 2) Are treatment processes or equipment with continuous inflow of hazardous waste equipped with a means to stop the inflow? (e.g., waste feed cutoff system or bypass system to a standby containment device) _____ Yes, _____ No.

- 3) Are waste analyses performed or written documentation obtained before placing a substantially different hazardous waste into treatment processes or equipment? _____ Yes, _____ No.
- 4) Is this information recorded in the facility's operating record? _____ Yes, _____ No.
- 5) Are daily inspections conducted for discharge control equipment (e.g., bypass systems, waste feed cutoff systems, drainage systems and pressure relief systems)? _____ Yes, _____ No.
- 6) Is data gathered from monitoring equipment (e.g., pressure and temperature gauges) daily? _____ Yes, _____ No.
- 7) Are construction materials of the treatment process or equipment and the immediate surrounding area inspected weekly for signs of leakage, corrosion or any other deterioration? _____ Yes, _____ No.
- 8) Are the results of these inspections recorded in an inspection log or summary? _____ Yes, _____ No.
- 9) Are ignitable or reactive wastes placed in a treatment process? _____ Yes, _____ No. If yes: _____ Are wastes treated, rendered, or mixed before or immediately after placement in the treatment process or equipment so that the resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive wastes under Section 261.21 or 261.23 of the RCRA Regulations? _____ Are wastes treated in such a way that they are protected from any material or conditions which may cause the waste to ignite or react?
- 10) Are incompatible wastes kept from being placed in the same treatment process or equipment? _____ Yes, _____ No.

O. Permit Requirements (10.51.07)

- 1) Does the facility have a DHS permit for its activity? _____ Yes, _____ No.
 If no, has the facility submitted an application for a DHS permit? _____ Yes, _____ No.
- 2) List any special Permit requirements that are not in full compliance.

Comments: THE OFFICIAL NAME OF THIS FACILITY HAS BEEN CHANGED TO OCCIDENTAL CHEMICAL CORPORATION. THIS FACILITY HAS ALWAYS DEALT WITH MARISOL, INC., MIDDLETOWN, NJ AS THE DISPOSAL FACILITY OF THEIR HAZARDOUS WASTE. (Therefore, Occidental Chem. Corp. have not utilized the Solley Rd Landfill). Notes regarding the most recent off-site shipments: A 91757 4/21/82 Waste Solvent, NOS Flammable, Methyl Ethyl Ketone Liquid 2450 Gal 49 DR F005, conc. 99.99% Hauler: Marisol, Inc., Middletown, NJ. Facility: Marisol, Inc.; A 91758 6/22/82 Waste Solvent, NOS Flammable Methyl Ethyl Ketone Liquid 4000 Gal 80 DR F005 conc. 99.99% HAULER: S-J Transportation, Woodstown, NJ (an independent hauler; NJT 00000 9027). Facility: Marisol, Inc. On/Regarding the Generator section of the State of MD manifest, (CONTINUED NEXT PAGE)

Inspector's Name: W. Fortuna Title: Nat. Resource Div. - Waste Mgmt. Admin.

Facility Location: OCCIDENTAL CHEMICAL CORPORATION SALISBURY, MARYLAND

Facility Rep. present during inspection: BARBARA SELBY Title: Plant Manager

State of Maryland
Department of Health and Mental Hygiene
Office of Environmental Programs
201 West Preston Street, Baltimore, Maryland 21201

Report of Observations

Type of Inspection/Observations: DHS Inspection Form Date 06/23/82

Facility Name: OCCIDENTAL CHEMICAL CORPORATION SAHSBURY, MARYLAND

Remarks: CONTINUED

the Facility name and address was not completed on manifest A 91757 and only the address was present on manifest A 91758. This Facility shall/manifest complete the Facility name and address on the State of MD manifest forms. (in Generator Section)
ON 4/6/82, a Hazardous Materials Training Session was conducted by William Palm, Traffic Mgr. (from Pottstown Facility) which covered placards, warning signs, hazard labels + markings, shipping containers, transporting DHS, shipping papers etc. Records are maintained of personnel who attend the training sessions. Records regarding job descriptions pertain to predominantly the job conducted and duties involved at the plant; with a general overall description of hazardous waste management. Contingency Plan and Emergency Procedures are maintained in their manual titled "Hazardous Materials Contingency Plan and Personnel Training". Regarding ^{Internal communication/alarms system} fire control equipment: Facility includes paging system, fire alarm stations, air horns for signaling emergencies, if sprinkler system goes off - noise alarm; CO₂ fire extinguishers, dry chemical extinguishers, 1 1/4" hose throughout plant, sprinkler systems. Regarding Waste Analysis: Facility has not had their waste laboratory analyzed, but have a DATA SHEET consisting of the best estimate of the Waste Solvent → MEK 84%, Isopropyl Acetate 12.75%, Isopropyl Alcohol 2.25%. Oil Spill basin Area - no trucks have been unloading in this area since approx JAN. 1982. John Summerville is presently filling out manifest and handling shipping (under B. Seldemridge supervision); Bob Hurley, Mining Dept. Foreman, manages the fenced in storage area. Hazardous Waste Storage Area: contained 15 DR, earliest dated starting accumulation date 6/11/82, drums all labelled, drums appeared in good condition.

A copy of this report was left at the Facility for Barry Selbinger, Plant Engineer.

Land Disposal Restriction Notification

GEN

Generator Name: ACCIDENTAL CHEM. Address: MARVEL RD & GODDARD PKWY
SALISBURY MD 21801.

Generator EPA ID Number: MDD056497589 Manifest Number MDC0249157

This form is submitted to OLDOVER CORP. in accordance with the regulations published by EPA in 40 CFR 268, which govern the land disposal of certain untreated hazardous wastes. In accordance with the waste analysis and recordkeeping requirements specified in 40 CFR 268.7, I have indicated how my waste must be managed to conform to the land disposal restrictions. "F" Solvent and California Listed Wastes are shown on the back of this form. Treatment standards for all waste codes and/or categories can be found in 40 CFR 268.

This is a Non-Wastewater unless this box is checked ☐ indicating Wastewater.

EPA Waste Code	Waste Description or Category/Constituent (Mark N/A if not Not Applicable)	Treatment Standard Reference and/or Treatment 5 Letter BDAT Treatment Code
D001	ignitable liquid	(unl. substitute)
D007	chromium	mg/l 5
D008	lead	mg/l 5

I am the generator of an untreated waste identified either above or on the back of this form which must be treated to the appropriate treatment standard set forth in 40 CFR 268. This information is based upon (check appropriate box) ☐ an analysis of the waste (attach if available); or ☐ knowledge of the waste stream or generating process.

Signature Heather M. Sheehan Title Env. Mgr. Date 9/12/91

For each "F" solvent waste constituent present in this waste, it is listed below and the appropriate space is checked.

Waste Code: F005

The following is Table CCWE, 268.41 Treatment Standards expressed as concentrations in waste extract.

Solvent Constituent	Wastewater (mg/L)	Non-Wastewater (mg/L)
Acetone	0.05	0.5
n-Butyl Alcohol	0.0	0.0
Carbon Disulfide	1.05	0.01
Carbon Tetrachloride	0.05	0.05
Chlorobenzene	0.15	0.05
Cresols	2.02	0.75
Crotylic Acid	2.02	0.75
X Cyclohexanone	0.125	0.75
1,2-Dichlorobenzene	0.05	0.125
Ethyl Acetate	0.05	0.75
Ethyl Benzene	0.05	0.05
Ethyl Ether	0.05	0.75
Isobutanol	0.0	0.0
Methanol	0.25	0.75
Methylene Chloride	0.20	0.05
X Methyl Ethyl Ketone	0.05	0.75
X Methyl Isobutyl Ketone	0.05	0.05
Nitrobenzene	0.05	0.125
Pyridine	1.12	0.05

INSTRUCTIONS: If you received a preprinted label, affix it in the space at left. If any of the information on the label is incorrect, draw a line through it and supply the correct information in the appropriate section below. If the label is complete and correct, leave Items I, II, and III below blank. If you did not receive a preprinted label, complete all items. "Installation" means a single site where hazardous waste is generated, treated, stored and/or disposed of, or a transporter's principal place of business. Please refer to the INSTRUCTIONS FOR FILING NOTIFICATION before completing this form. The information requested herein is required by law (Section 3010 of the Resource Conservation and Recovery Act).

I. Generators

A. Description (10.51.03.01-03)

- 1) Does the Facility generate or has it accumulated those quantities of hazardous waste described in 10.51.02.05 C? ☒ Yes, ☐ No.
- 2) Has the facility obtained an EPA identification number? ☒ Yes, ☐ No.
- 3) Describe the amount of waste generated. (day, week or month) 5000 - from end of 1985 to 11/16/86
- 4) Under which category is the waste(s)?
☒ Ignitable ☒ Reactive ☐ Corrosive ☒ EP Toxic ☒ RCRA Listed N/A

B. Manifest (10.51.03.04)

- 1) Is Maryland manifest system in operation for off-site shipment? ☒ Yes, ☐ No.
- 2) Is TSD Facility to receive DHS identified by ☒ Name, ☐ Address, ☐ EPA ID Number?
- 3) Is alternate facility identified? ☒ Yes, ☐ No.
- 4) Is generator identified by ☒ Name, ☒ Address, ☐ Telephone Number, ☒ MD/EPA ID Number?
- 5) Is each transporter identified by ☒ Name, ☒ EPA ID Number, ☒ Maryland Certification Number?
- 6) Is waste properly described? ☒ Yes, ☐ No.
- 7) Is shipment date marked? ☒ Yes, ☐ No.
- 8) Is quantity of waste described by ☒ Unit of Weight, ☐ Volume?
- 9) Are containers to be loaded identified by ☒ Type, ☐ Number?
- 10) Is proper certification noted and signed by generator? ☒ Yes, ☐ No.
- 11) Are adequate copies available for operator, transporter and TSD? ☒ Yes, ☐ No.

C. Pre-Transport Requirements (10.51.03.05)

- 1) Is each container marked with date accumulation began? ☒ Yes, ☐ No. If yes, has any waste been stored over 90 days? ☒ Yes, ☐ No. How much _____
- 2) Are containers in good condition? ☒ Yes, ☐ No. If no, explain _____
- 3) Are containers properly labeled? ☒ Yes, ☐ No.
- 4) Does generator have approved emergency contingency plan? ☒ Yes, ☐ No.

D. Recordkeeping and Reporting (10.51.03.06)

- 1) Does the generator have: copies of all signed manifests from the previous three years? ☒ Yes, ☐ No; copies of each Annual Report and Exception Report? ☒ Yes, ☐ No.
- 2) Does the generator retain, for a period of three years, all wastes analyses? ☒ Yes, ☐ No.
- 3) Has the generator filed Exception Reports as required by 10.51.03.06 C? ☒ Yes, ☐ No.

II. Treatment, Storage, Disposal (TSD)

A. Site characterization (10.51.05.02)

- 1) Facility Type
☒ Thermal Treatment ☐ Biological Treatment
☒ Recycling/Recovery ☐ Land Treatment
☒ Waste Oil ☐ Incineration
☒ Chemical Treatment ☐ Landfill Operation
☒ Physical Treatment ☐ Below Ground Tanks
☒ Open Pile ☐ Other
☒ Surface Impoundment
☒ Drums
☐ Above Ground Tank(s)

- 2) Does facility generate DHS? ☐ Yes, ☐ No.
- 3) Does facility have waste analysis plan? ☐ Yes, ☐ No. If yes, are the procedures of that plan being followed? ☐ Yes, ☐ No.
- 4) Can facility personnel identify DHS being handled? ☐ Yes, ☐ No.
- 5) Can facility personnel confirm that DHS received equal those on manifest form? ☐ Yes, ☐ No.
- 6) Is there a 24-Hour surveillance system to monitor active portion of facility? ☐ Yes, ☐ No. If No, is there an artificial or natural boundary? ☐ Yes, ☐ No. Is there a means to control entry? ☐ Yes, ☐ No. Is there a restricted access sign posted? ☐ Yes, ☐ No.
- 7) Does facility have: ☐ emergency equipment inspection log, ☐ written schedule for inspections, ☐ security devices, operating & structural prevention equipment?
- 8) Have facility personnel completed classroom/on-site training? ☐ Yes, ☐ No. Are records maintained of: ☐ Job titles/names of employees ☐ job descriptions, ☐ Type/amount of continuing training?
- 9) Are general requirements for Ignitable, Reactive or Incompatible Wastes as required in 10.51.05.02 H addressed? ☐ Yes, ☐ No.

B. Preparedness and Prevention (10.51.05.03)

- 1) Facility has the following equipment? ☒ Internal communication/alarm system for on-site personnel, ☐ device for summoning emergency assistance, ☐ adequate fire control equipment, water, & suppression chemicals, ☐ list of aforementioned equipment.
- 2) Does facility have adequate area for emergency movement? ☒ Yes, ☐ No.

C. Contingency Plan and Emergency Procedures (10.51.05.04)

- 1) Does facility have an approved contingency plan for: ☒ Personnel to implement emergency procedures to fire, explosions, and unplanned releases to air, soil and water? ☒ Responding emergency units to provide assistance during emergency situations? ☐ A list of emergency equipment needed to cope with situation?
- 2) Are emergency response coordinators listed by name, address, & phone number? ☐ Yes, ☐ No.
- 3) Is there an evacuation plan if recommended? ☐ Yes, ☐ No.
- 4) Are emergency coordinators available on twenty-four hour basis? ☐ Yes, ☐ No.

D. Manifest System, Recordkeeping, and Reporting (10.51.05.05)

Facility has a written operating record which contains the following information:

- 1) ☐ description & quantity of DHS received.
- 2) ☐ method & date of DHS treatment, storage, or disposal.
- 3) ☐ location & quantity at each DHS location in facility.
- 4) ☐ detailed records & results of waste analysis & treatment tests performed.
- 5) ☐ detailed operating summary reports.
- 6) ☐ description of emergency incidents that required implementation of contingency plan.
- 7) ☐ records & results of inspections of emergency equipment, TSD systems & hazardous waste areas.
- 8) Has facility retained, for at least 3 years, copies of all manifests? ☐ Yes ☐ No

E. Groundwater Monitoring (10.51.05.06)

- 1) Has facility implemented a groundwater monitoring program? ☐ Yes, ☐ No, ☐ N/A.
- 2) Are samples from the groundwater monitoring system being analyzed according to the groundwater sampling and analyses plan? ☐ Yes, ☐ No.
- 3) Is this plan set up in accordance with 10.51.05.06 C? ☐ Yes, ☐ No.
- 4) Has groundwater quality assessment program been prepared? ☐ Yes, ☐ No.
- 5) Are proper groundwater sampling and analyses records kept? ☐ Yes, ☐ No.
- 6) Are the necessary reports on groundwater monitoring information being forwarded to the Secretary? ☐ Yes, ☐ No.
- 7) Do the reports match the facility records? ☐ Yes, ☐ No.

F. Closure, Post-closure, and Financial Requirement (10.51.05.07 & .08)

- 1) Does the facility have an approved closure plan that meets the financial requirements? ☐ Yes, ☐ No.
- 2) For surface impoundments, land treatment, and landfills, does the facility have an approved post-closure plan that meets the financial requirements? ☐ Yes, ☐ No.
- 3) Does facility maintain liability insurance? ☐ Yes, ☐ No.

G. Container Management (10.51.05.09)

- 1) Are all containers: (a) ☐ in good condition, i.e., no signs of leakage, corrosion, or any other deterioration/deformation; (b) ☐ lined or made of compatible material such that hazardous wastes placed into them will not result in reaction or corrosion; (c) ☐ sealed during storage.
- 2) Are storage areas for hazardous waste containers inspected by owner/operator at least once a week? ☐ Yes, ☐ No.
- 3) Is an inspection log maintained? ☐ Yes, ☐ No.
- 4) Are containers holding ignitable or reactive waste located at least 50 feet from the facility's property line? ☐ Yes, ☐ No.
- 5) Are incompatible wastes placed in separate containers? ☐ Yes, ☐ No.
- 6) Are storage containers holding hazardous wastes which are incompatible with nearby materials stored in containers, tanks, piles, or surface impoundments separated by dikes, berms, walls, or other devices? ☐ Yes, ☐ No.

H. Tanks (10.51.05.10)

- 1) Are all tanks in good condition, i.e., no signs of leakage, corrosion, or any other deterioration? ☐ Yes, ☐ No.
- 2) Are uncovered tanks operated to ensure a minimum of two feet of freeboard? ☐ Yes, ☐ No. If not, is tank equipped with a containment structure (e.g., dike or trench), a drainage control system, or a diversion structure (e.g., standby tank) with a capacity that equals or exceeds the volume of top 2 ft. of the tank? ☐ Yes, ☐ No.
- 3) Are tanks with continuous inflow of hazardous waste equipped with a means to stop this inflow (e.g., waste feed cut-off system or by-pass to a standby tank)? ☐ Yes, ☐ No.
- 4) Are waste analyses conducted or written documentation obtained before placing a substantially different hazardous waste into tank used for storage or treatment? ☐ Yes, ☐ No.
- 5) Are daily inspections conducted for discharge control equipment (e.g., by-pass systems, waste feed cut-off systems and drainage systems)? ☐ Yes, ☐ No.
- 6) Is data gathered from monitoring equipment (e.g., pressure and temperature gauges) at least once each operating day? ☐ Yes, ☐ No.
- 7) Is the level of waste in the tank checked at least once each operating day? ☐ Yes, ☐ No.
- 8) Is (are) the tank(s) inspected weekly to detect corrosion or leaking of fixtures or seams? ☐ Yes, ☐ No.
- 9) Are the results of these inspections recorded in an inspection log or summary? ☐ Yes, ☐ No.
- 10) Are ignitable or reactive wastes stored in tanks? ☐ Yes, ☐ No. If yes:
 - a) Is the waste treated, rendered, or mixed before or immediately after placement in the tank so that the resulting waste, mixture, or dissolution of materials no longer meets the definition of ignitable or reactive wastes under Parts 261.21 or 261.23 of the RCRA Regulations?

- b) Is waste stored or treated in such a way that it is protected from material or conditions which may cause the waste to ignite or react? ☐ Yes, ☐ No.
- c) Is owner/operator of a facility which treats or stores ignitable or reactive wastes in covered tanks in compliance with the National Fire Protection Association's (NEPA's) buffer zone requirements for tanks contained in tables 2-1 through 2-6 of the "Flammable and Combustible Code—1977"? ☐ Yes, ☐ No.

I. Surface Impoundments (10.51.05.11)

- 1) Is two feet of freeboard maintained in the surface impoundment? ☐ Yes, ☐ No.
- 2) Do all earthen dikes have protective covers (e.g., grass, shale or rock) to minimize wind and water erosion and to preserve dike structural integrity? ☐ Yes, ☐ No.
- 3) Are waste analyses conducted or written documentation obtained before placing a substantially different hazardous waste into a surface impoundment used for storage or treatment? ☐ Yes, ☐ No.
- 4) Is the freeboard level inspected daily? ☐ Yes, ☐ No.
- 5) Is the surface impoundment, including dikes and vegetation, inspected weekly to detect leaks, deterioration, or failures in the impoundment? ☐ Yes, ☐ No.
- 6) Are the results of these inspections recorded in an inspection log or summary? ☐ Yes, ☐ No.
- 7) Are ignitable or reactive wastes stored in a surface impoundment? ☐ Yes, ☐ No. If yes:
 - a) Is the waste treated, rendered, or mixed before or immediately after placement in the impoundment so that the resulting waste, mixture or dissolution of material no longer meets the definition of ignitable or reactive waste under Parts 261.21 or 261.23 of the RCRA Regulations? ☐ Yes, ☐ No.
 - b) Are incompatible wastes segregated in separate surface impoundments so that spontaneous reactions are avoided? ☐ Yes, ☐ No.

J. Waste Pile (10.51.05.12)

- 1) Is wind dispersal of the pile controlled? ☐ Yes, ☐ No, ☐ Not Needed.
- 2) Are additions to the pile being analyzed prior to adding them to the pile? ☐ Yes, ☐ No.
- 3) Is hazardous waste leachate or runoff collected? ☐ Yes, ☐ No. Is the pile protected from precipitation and runoff? ☐ Yes, ☐ No.
- 4) Are ignitable or reactive wastes protected from materials or conditions that might cause it to ignite or react? ☐ Yes, ☐ No, ☐ N/A.
- 5) Are incompatible wastes hauled in a manner as to assure separation? ☐ Yes, ☐ No, ☐ N/A.

K. Land Treatment (10.51.05.13)

- 1) Will the use of land treatment result in the waste being less hazardous or non-hazardous? ☐ Yes, ☐ No.
- 2) Is run-on diverted away from the active portion of the facility? ☐ Yes, ☐ No. Is run-off from the active portion of the facility collected? ☐ Yes, ☐ No.
- 3) Has the proper waste analyses been performed? ☐ Yes, ☐ No.
- 4) If food chain crops are to be grown on the active portion of the facility has the necessary documentation required been provided? ☐ Yes, ☐ No.
- 5) Has the owner/operator written and implemented an unsaturated zone monitoring plan? ☐ Yes, ☐ No.
- 6) Have the additional requirements for a closure and post-closure plan been addressed? ☐ Yes, ☐ No.
- 7) Are ignitable or reactive wastes immediately incorporated into the soil? ☐ Yes, ☐ No.
- 8) Are incompatible wastes hauled according to 10.51.05.13 I? ☐ Yes, ☐ No.

L. Landfills (10.51.05.14)

- 1) Is run-on diverted away from the facility's active portions? ☐ Yes, ☐ No.
- 2) Is run-off collected from the landfill's active portions? ☐ Yes, ☐ No.
- 3) Has a hazardous waste determination been made on the run-off? (Identification and Listing of Hazardous Waste) ☐ Yes, ☐ No.
- 4) Is the landfill managed so as to control wind dispersal?

- 3) Are waste analyses performed or written documentation obtained before placing a substantially different hazardous waste into treatment processes or equipment? ____ Yes, ____ No.
- 4) Is this information recorded in the facility's operating record? ____ Yes, ____ No.
- 5) Are daily inspections conducted for discharge control equipment (e.g., bypass systems, waste feed cutoff systems, drainage systems and pressure relief systems)? ____ Yes, ____ No.
- 6) Is data gathered from monitoring equipment (e.g., pressure and temperature gauges) daily? ____ Yes, ____ No.
- 7) Are construction materials of the treatment process or equipment and the immediate surrounding area inspected weekly for signs of leakage, corrosion or any other deterioration? ____ Yes, ____ No.
- 8) Are the results of these inspections recorded in an inspection log or summary? ____ Yes, ____ No.
- 9) Are ignitable or reactive wastes placed in a treatment process? ____ Yes, ____ No. If yes:
____ Are wastes treated, rendered, or mixed before or immediately after placement in the treatment process or equipment so that the resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive wastes under Section 261.21 or 261.23 of the RCRA Regulations?
____ Are wastes treated in such a way that they are protected from any material or conditions which may cause the waste to ignite or react?
- 10) Are incompatible wastes kept from being placed in the same treatment process or equipment? ____ Yes, ____ No.

- 1) Prior to burning waste not previously incinerated or thermally processed, does the operator conduct waste analysis for the following:
_____ heating value of the waste;
_____ halogen content and sulfur in the waste;
_____ concentrations of lead and mercury unless documented data is available which show these elements not to be present?
- 2) Are instruments related to combustion and emission control monitored at least every 15 minutes? _____ Yes, _____ No.
- 3) Is the stack plume observed visually at least hourly for color and opacity? _____ Yes, _____ No, _____ N/A.
- 4) Is the incinerator or thermal process and associated equipment inspected daily for leaks, spills and fugitive emissions? _____ Yes, _____ No.
- 5) Is all of the above information documented in the facility's operating record? _____ Yes, _____ No.

- 1) Are all treatment processes or equipment in good condition, i.e., no signs of leakage, corrosion or any other deterioration? _____ Yes, _____ No.
- 2) Are treatment processes or equipment with continuous inflow of hazardous waste equipped with a means to stop the inflow? (e.g., waste feed cutoff system or bypass system to a standby containment device) _____ Yes, _____ No.

1) Does the facility have a DHS permit for its activity?
Yes, No,
If no, has the facility submitted an application for a DHS permit? Yes, No,

2) List any special Permit requirements that are not in full compliance.

Facility Rep. present during inspection: _____ Title: _____
